6th Annual
Science & Bible –
21st Century Understanding
### Saturday, July 16, 2016

St. Lucas Community Church
1195 Manning Ave. N., Lake Elmo, MN 55042

Live presentations by Spike Psarris – former engineer in US military space program; author of 3 vol. "What You Aren't Being told About Astronomy" and Don Slinger

Hear the latest scientific data, how it relates to the Bible and how to apply it to your life. The flyer is downloadable at www.stlucascc.org and http://tccsa.tc

8:50-9:00	Opening remarks and speaker introduction
9:00-10:00	*Our Created Solar System* **– Spike Psarris** Did our Solar System form from a cloud of gas billions of years ago, as secular astronomers claim? Or was it created by God, as the Bible says? This presentation goes planet-by-planet through our Solar System, showing how each of the planets (along with many of their moons) uniquely contradicts secular origins models.
10:00-10:10	Break and book table
10:10-10:50	*Bible Timeline* **– Don Slinger** Consider some recent genetic, archaeological and geological findings in relation to the Bible Timeline. An accurate foundation is necessary for accurate data interpretation. The establishment of the laws of nature, mathematics, logic, etc. require something that is more than and outside the limits of space, matter, energy, life and time. Phenomenal findings and new understanding in recent years.
10:50-11:00	Break and book table
11:00-Noon	*Our Created Universe* **– Spike Psarris** This presentation debunks Big Bang cosmology. It shows why the Big Bang model fails scientifically, and discusses the dangers of compromising our view of Scripture in order to accept it (which many Christians are doing today). The universe does not testify of a Big Bang; instead, the heavens declare the glory of God.

Enhance your spiritual confidence with the facts and compelling reasons for your faith so that you can give a reasoned answer to yourself and to others. Reconnect history, science and the Bible.
